Java Bean 3

Java Bean

Java Bean ou POJO : Plain Old Java Object

```
A JavaBean is a specially constructed Java class written in the Java and
coded according to the JavaBeans API specifications.

Following are the unique characteristics that distinguish a JavaBean from
other Java classes:

    It provides a default, no-argument constructor.

    It should be serializable and implement the Serializable interface.

    It may have a number of properties which can be read or written.

    It may have a number of "getter" and "setter" methods for the
properties.
```
